

SISIEGINI.

On October 2, 1978, Card Walker, President and Chief Executive Officer of Walt Disney Productions, announced the Company's decision to move forward with the EPCOT Center project. We were particularly proud to be able to make this announcement before the 26th World Congress of the International Chamber of Commerce meeting at Walt Disney World. For, the ICC is perhaps the most august business organization in the world and, until this year, had never assembled outside the capital city of a host nation. The more than 2500 international business and political leaders attending, including President Jimmy Carter, showed great interest and enthusiasm for EPCOT Center which was announced with the following remarks:

"We are proud that you have chosen Walt Disney World for the site of the 26th World Congress addressing the theme: "Enterprise, freedom and the future." For, in many ways, those three words crystallize the principles upon which our company has been founded. I can assure you that we stand with the optimists on all three of these subjects.

It is our belief that the private enterprise system and individual freedom are keys which can open a positive and exciting future for the world.

This is why it gives me such great pleasure to announce to this gathering that with the support of corporation and government interests around the world, we are about to take a major new step in the realization of Walt Disney's greatest dream.

More than a dozen years ago, Walt Disney outlined his belief that the critical problems facing the world can and will be solved by creative people who are both dreamers and doers ... people in universities, government, business and industry. Even then, he was convinced that solutions to many of our problems already existed and that every day others were emerging from the world's creative centers. He believed that if these ideas could be communicated to people in ways they understand and believe, the decisions they make for tomorrow would provide all of us a better world.

Walt Disney dreamed of a showplace for the concepts of tomorrow that would never be completed. But always introducing, testing and demonstrating new ideas, new materials and new systems. A center for the communication of new concepts that would always be in a state of becoming...giving voice to an optimistic future and confidence in the ingenuity and imagination of free, enterprising men and women. He called his dream EPCOT—Experimental Prototype Community Of Tomorrow.

For more than seven years that dream has been taking shape here on our 43-square mile property in Florida. Since its opening in 1971, Walt Disney World has become an important showplace for new concepts, introducing and demonstrating scores of innovative systems and technologies—including new energy systems, advanced central computer systems, electric-powered transportation systems, trash disposal and water control systems, electronic telephone systems and many more. And, as Walt Disney dreamed, this showplace for the concepts of tomorrow continues to be in a state of becoming.

Today, with enormous enthusiasm and excitement we are announcing that EPCOT Center—a vast new project for public interface with the concepts of tomorrow—will open October 1, 1982. This new project will be located just two miles from the Contemporary Resort Hotel and will be linked to the present Vacation Kingdom by Monorail.

At a cost approximating one-half billion dollars, EPCOT Center will consist of two major themed areas: Future World and The World Showcase. The first of these will dramatize the history and future challenges of the critical problems facing us today—providing a public window onto the worlds of energy, transportation, the land, the seas, space, life and health and other subjects. Future World will also include a "global marketplace of new ideas" which we shall call Future World Mall.

In this communications core of EPCOT Center, industry and the public will participate in a "hands on" exchange of new and exciting systems, products and technologies.

The World Showcase will be a "community of nations," the only permanent international exposition of its kind anywhere, focusing on the culture, traditions, tourism and accomplishments of people around the world. A model for true people-to-people exchange, The World Showcase will offer participating nations an opportunity to send their outstanding young adults to operate the attractions, shops, restaurants, and exhibits of their pavilion. And these young people who will work, play and learn together for a period of up to one year will help to generate international understanding.

Both Future World and The World Showcase will also include major introductory theme shows. At the entrance to EPCOT Center, Spaceship Earth will introduce the EPCOT concept and invite guests to explore the many pavilions of Future World. Acting as a gateway and host to the nations of The World Showcase, The American Adventure will present the remarkable history of the American people.

From the beginning we have known that a project of this magnitude could not and should not move forward on the creative or financial strength of any one organization. And I am pleased to tell you today that EPCOT Center has already received an exciting response and considerable support from American as well as international interests.

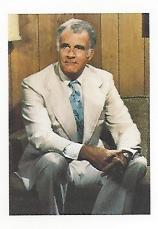

As of now, Walt Disney Productions has received letters of intent or contracts from four of the world's largest corporations for participation in EPCOT Center's Future World. General Motors will present transportation, Exxon will present energy, Kraft will present the land. In addition, a major show is being designed for presentation by American Telephone and Telegraph.

We have also received letters of intent from business or government interests in ten nations for participation in the first phase of The World Showcase—including the United Mexican States, Japan, The Federal Republic of Germany, The Kingdom of Morocco, Canada, The State of Israel, The United Kingdom, The French Republic, United Arab Emirates, and The Italian Republic. And in the months to come we anticipate substantial additional support both for this and the planned second phase of EPCOT Center.

Ladies and gentlemen, we believe this new project can have importance to the international business community. We believe EPCOT Center can be a landmark in the promotion of private enterprise, individual freedom and international cooperation. For this reason we are eager to give you an opportunity to preview EPCOT Center as our first public audience. I would like to extend a special invitation to every one of you to explore, at your convenience, our plans and concepts for this new project."

Transcript of Remarks by Card Walker Before the International Chamber of Commerce October 2, 1978

To our shareholders, employees, and associates:

As our special report indicates, we have now undertaken the greatest project in the history of Walt Disney Productions. There could be no better finishing touch to Mickey Mouse's 50th birthday year and fiscal 1978. For, the full measure of our success this year is perhaps best reflected in the business confidence and financial foundation it has provided for our decision to proceed with EPCOT Center.

For our fiscal year ended September 30, 1978, we completed our eleventh consecutive year of record revenues and net income. Revenues for the year increased 18% to \$741,143,000, while net income increased 20% to \$98,385,000 or \$3.04 per share.

The Board of Directors, at its meeting on November 29, 1978, increased the indicated annual dividend to 48¢ per share from the 32¢ per share paid during fiscal year 1978, an increase of 50% over the prior year. This is the third increase in the cash dividend in the past 3 years.

During 1978, the Disney theme parks demonstrated a remarkable vitality, with both Disneyland and Walt Disney World establishing new all-time attendance records. Disneyland, which is approaching its 25th birthday in 1980, reconfirmed its continuing growth potential by turning in a second straight record year. Walt Disney World, already the most popular destination resort in the world, once again surpassed even our own expectations, breaking the 14 million mark in total guest attendance.

We are also able to report a new all-time high for our motion picture business. In fact, new records were achieved in both domestic and foreign film rentals.

The domestic reissue of "The Jungle Book" in June of 1978 proved extremely strong. And the Company's other two summer releases, "Hot Lead and Cold Feet" and "The Cat From Outer Space," also achieved good results, helping to establish 1978 as our best year in history for domestic film rentals.

However, even these outstanding performances were overshadowed by what has now become a truly astounding foreign achievement from our newest animated feature film, "The Rescuers." In worldwide first release rentals, "The Rescuers" is now the Disney box office champion, having passed even the \$45 million record of "Mary Poppins." "Herbie Goes to Monte Carlo," our second sequel to the highly successful "Love Bug,"

was another major contributor to our record year in foreign film business.

At the same time virtually every one of the ancillary activities within our Consumer Products Division achieved record results.

The passage by Congress this year of the Sawtooth National Recreation Bill, an omnibus parks measure, has officially added the Mineral King Valley to Sequoia National Park. This action brings to an end our proposed Mineral King project.

The status of our Independence Lake project remains the same as reported in the Company's third quarter report. Although the Company has extended complete cooperation to both the Forest Service and the agencies of the State of California which are involved, we have not received the requested assurances of a positive, responsive, and responsible attitude and action plan for the project. Our desire to provide America's most populous state with high-quality year-round recreational opportunities has not diminished, but we are frankly still discouraged at the prospects of achieving this objective.

In line with our policy of constantly enhancing our business opportunities, we have this year, for the first time, made a limited number of non-classic feature films available to the cable television industry. We will, of course, continue to evaluate the place for cable television in our future before launching into any extensive activity in this area.

We are currently negotiating a final definitive agreement for the Tokyo Disneyland Project. Though we remain optimistic that these negotiations will be concluded by the end of the year, we do not intend to move forward with the project until the agreement is finalized.

As regards 1979 and the future, our solid financial position, the success of the past year and the enthusiastic support our EPCOT Center project has received from business and government interests around the world make us optimistic. Despite our country's somewhat troubled economy, which we will, of course, continue to closely monitor as it affects our business, we are confident that Walt Disney Productions faces the brightest future in its history.

A year ago we noted that our Company stood on another new threshold, ready to raise the curtain on a new generation of Disney entertainment. As you review this annual report of 1978, you will see that this new generation has now come of age, taking center stage in this year's success as well as our plans for the future.

Card Walker

President and Chief Executive Officer

and Walke

November 29, 1978

LAKE BUENA VISTA: 64 new cluster homes were designed to blend with the natural beauty of the surroundings.

Walt Disney World

1978 was a landmark year at Walt Disney World, in attendance and revenues as well as operational aspects.

In fiscal 1978 the Magic Kingdom theme park established a new all-time attendance record of 14,071,000, up 7.8% over the prior year. Total revenues at Walt Disney World for the year ending September 30, 1978 increased 15% to \$345,638,000.

During the same period the Vacation Kingdom's three resort hotels—the Contemporary, Polynesian Village and Golf Resort—Fort Wilderness Campgrounds and the variety of Disney accommodations in Lake Buena Vista, all operated at virtually full occupancy. This included the 144-room addition at the Polynesian Village and 64 new cluster homes in Lake Buena Vista, both of which

opened at mid-summer.

In addition, the record year in Florida was reflected in substantially improved operations for Walt Disney World Village in Lake Buena Vista. This improved picture is also being impacted by our continuing efforts to expand the entertainment opportunities available to our Lake Buena Vista guests and visitors. This includes an on-going re-evaluation and modification of the shopping and dining experience we offer at the Village and the presentation of art shows, boat shows, Halloween parades, the annual Christmas pageant and other activities.

The year-long celebration of Mickey Mouse's 50th birthday highlighted the year's schedule of entertainment, with a special daily parade and salute to Mickey and a weekend party on November 18 and 19 featuring top-name stars and other birthday activities.

The most important event of 1978, however, occurred at fiscal year's end when the 26th World Congress of the International Chamber of Commerce convened at the Contemporary Resort Hotel. This prestigious gathering introduced more than 2500 of the world's top business and political leaders to the vast entertainment and recreational facilities available at our Florida property as well as providing an excellent platform for our announcement of the EPCOT Center project. We believe this meeting will prove extremely valuable as regards both the realization of EPCOT Center and the future success of Walt Disney World.

^{*}Reclassified for comparative purposes and to comply with reporting for business segment requirements adopted in 1978.

Walt Disney World

Phase 2:

IEPCOT CIENTIER

On October 2, 1978, immediately following Card Walker's announcement of our decision to proceed with EPCOT Center, Florida Governor Reubin Askew spoke before a gathering of business and political leaders from Central Florida. In part, he said:

"... We have every right to be pleased from a tremendous sense of pride in the accomplishments and quality of service that this great organization furnishes. But more than that we're going to have an opportunity to furnish a forum hopefully to try to make this earth a better place in which to live. And that's why I've been enthused. That's why I say that this isn't just another undertaking of a private corporation. This is a stimulation and a re-commitment to the entire system of private enterprise—without which whatever economy we may have in the industrialized West couldn't be what it is today."

This and the numerous other indications of support we have received from around the world have established a bright beginning for the second phase of Walt Disney World.

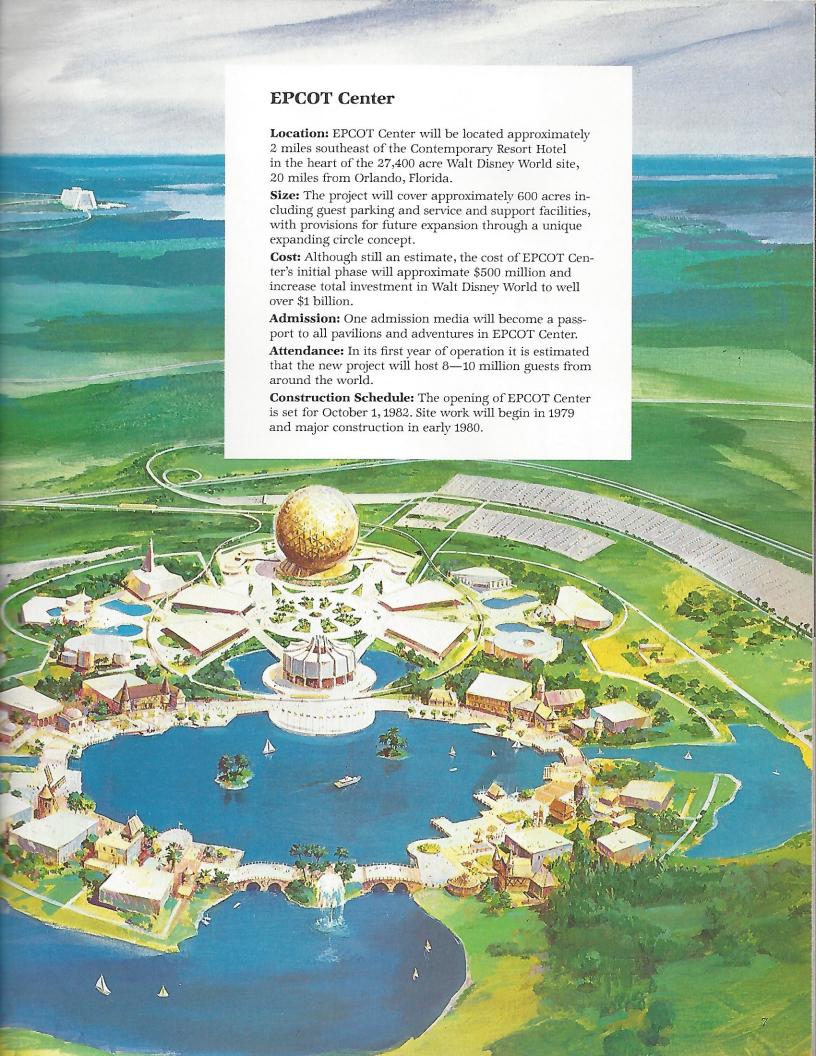

As pointed out in the president's special report, we have already received letters of intent or contracts from four of the world's largest corporations for participation in EPCOT Center's Future World: General Motors; Exxon, USA; Kraft Inc.; and American Telephone and Telegraph and as of now, the following foreign companies and nations in the World Showcase:

adidas—Adi Dassler KG Alfredo, the Original of Rome Associated Biscuits Ltd. Bass Export Ltd. Brauerei Beck & Co. British Airways British Railways Canada Canshow, Inc. Cartier Dunbee-Combex-Marx Ltd. Federal Republic of Germany French Republic Goebel Art GmbH Guinness Overseas Ltd. Heraldic Promotions Hutschenreuther AG Italian Republic

Japan Air Lines Co. Ltd. Kingdom of Morocco Librairie Hachette E. Leitz Inc. K. Mikimoto & Co. Ltd. Mitsukoshi Ltd. Noritake Co., Inc. Penicault Group Royal Doulton Tableware Ltd. St. Ursula Weingut und Weinkellerei GmbH Seiko Time Corp. Selfridges Ltd. State of Israel United Kingdom United Arab Emirates United Mexican States

Based upon this excellent reception and our own strong confidence in the project, we are proud to present the following summary and graphic overview of our most current plans for EPCOT Center and its two major themed areas: Future World and the World Showcase.

EPCOT CENTER

Future World

Future World will pose the challenges and preview the alternatives for the "Community of the Future." A forum for private enterprise, it introduces a new generation of Disney entertainment—as different from Disneyland and the Magic Kingdom of Walt Disney World as those American landmarks are from the original concept of an amusement park. The Future World presentations will be larger in scope and more sophisticated than any show in the history of Disney Imagineering, offering a unique new blend of entertainment and education. The principal components of Future World as outlined in last year's report will include:

Spaceship Earth: Inside this spectacular dome which dominates the entrance to EPCOT Center, Disney "Imagineers" have created an exciting "time machine" theatrical experience to introduce the concept and meaning of EPCOT.

Future World Mall: Serving as a marketplace for new ideas, systems and technologies this "Mainstreet of Tomorrow" will give the public a "hands on" opportunity to sample future concepts and products.

Energy: Presented by Exxon, USA, the Energy Pavilion will portray the major choices we must consider today... racing against the clock in a search for new energy and finally harvesting tomorrow's vast new sources for "The Future World of Energy."

Transportation: Presented by General Motors, the Transportation Pavilion illustrates how we have progressed through time in direct relation to our "freedom of mobility," simulating many of today's modes of transportation and previewing a variety of future transportation concepts.

The Land: Presented by Kraft Inc., the Land Pavilion will feature a variety of shows and attractions dramatizing the challenges in the important areas of nutrition, food production and the wise harvest of the land, focusing on the earth as a garden to be cultivated for its own and humankind's most beneficial use.

The Seas: Through an exciting ride-attraction, including an authentic ocean environment with marine life and an undersea restaurant, this pavilion will give guests a greater understanding of our relationship with the seas and the need for harmony between humankind and the vast world of water around us.

Life & Health: In theatrical and participatory experiences, visitors to the Life & Health Pavilion will gain a new awareness and appreciation of themselves, learning that good health is based, more than anything else, on their own responsibility and behavior.

Space: The passengers of this huge interstellar "Space Vehicle" will be transported to the edge of the universe in a journey that highlights our efforts to reach the stars, and the challenges and possibilities of future space technology and exploration.

The American Adventure: Serving as the gateway and host to the nations of the World Showcase, this crossroads pavilion of EPCOT Center will trace the story of the American people from the first step onto Plymouth Rock to the first step onto the moon.

During this year preceding our decision to move forward with EPCOT Center, the artists, designers, architects and other "Imagineers" at WED Enterprises have continued to develop and refine our concepts for Future World. We are pleased to tell you that they have made substantial progress on all of the planned pavilions. As part of this "work in progress" they have created several new and extremely exciting entertainment/communications techniques including new advances in our Audio-Animatronics process which promise the most life-like figures we have ever presented. In addition, we are working on a new concept for possible three-dimensional film projection, an exciting new variation of our exclusive CircleVision 360 process, new theatre-environments, and innovative new ways to move people.

At the same time, "imagineering" teams from WED are continuing to interface with creative research and development centers around the world to bring the greatest amount of expertise possible to bear on each subject covered by the EPCOT Center pavilions and

Future World Mall.

The World Showcase

The World Showcase will provide guests an opportunity to experience the endless variety of today's "Community of Nations," promoting better international understanding. Visitors here will discover the culture, traditions, tourism and accomplishments of the participating countries through a wide variety of exciting shows and attractions, restaurants and shopping streets unique to the individual nations. In this true people-to-people concept, sponsoring nations will stand side by side in friendship along the banks of a broad lagoon and will be invited to send their country's outstanding young adults to operate their pavilions. The current preliminary design concepts for the participants in the first phase of World Showcase include:

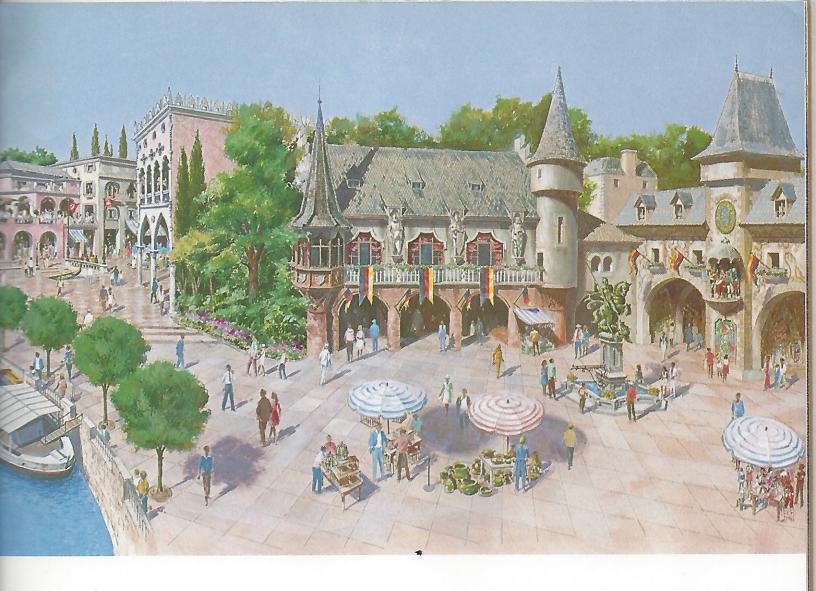

Japan Pavilion: A traditional wooden archway marks the entrance to this pavilion. A carrousel theater show, "The Winds of Change," will be located just past a ceremonial temple bell and an ornately-decorated pagoda. The four-act show features Audio-Animatronics figures and film. A section of the Ginza, Tokyo's famous night-time shopping and entertainment district will also be a part of the pavilion.

United Kingdom Pavilion: Green lawns, ornamental gardens, gable roofs and spires form the setting for this pavilion. An English pub and many themed shops, including the distinct beaux arts facade of Selfridges Department Store can be visited, and the iron and glass work of St. Pancras or Victoria Station can be seen. A 200-seat theater features a film tour of the United Kingdom.

French Republic Pavilion: The street life and flavor of Paris which revolve around the River Seine are captured in this pavilion. There will be a sidewalk cafe, a gourmet restaurant and shops. The street leads to Montmarte, the artists' quarter of Paris. There will be two full floors of shops featuring French perfumes, gift items and art.

Italian Republic Pavilion: The classic grace of Italy's art and architecture form the backdrop for this pavilion, with colonnades, gardens and shops. Re-creations of great Renaissance buildings can be seen from the center courtyard, as can the famous northeast tower of Naples' Nuovo Castle. Shops will feature jewelry, ceramics, porcelain, leather, basketry, marble work and glass.

Kingdom of Morocco Pavilion: The Koutoubia Minaret stands above re-creations of the rustic Hesperides Gardens and Jemaa Square. Beyond lies the labyrinth of the

Medina, where shops line the walkways. A "Magic of Morocco" dinner show will be presented in the evenings. **United Arab Emirates Pavilion:** Ancient Arabic Dhows (sailing ships) and a Bedouin encampment will be featured. The tents will house a variety of Arabian art objects, both on exhibit and for sale. Cultural displays and a restaurant offering traditional Arab food will also be featured. A magic carpet ride through the Arab World's fascinating cultures will include information on early Arabic contributions in the fields of astronomy, navigation and mathematics.

United Mexican States Pavilion: The highlight of this pavilion is a water excursion whose colorful boats are themed to the famous Xochimilco Gardens. They convey guests through a dramatization of Mexico's colorful and exciting history. Shops will offer authentic handicrafts. There will also be live entertainment and a Mexican dinner theater.

State of Israel Pavilion: Olive and cypress trees line the entrance, leading to a courtyard setting with shops clustered around the perimeter. Through an archway in the court can be seen a covered amphitheater characterized after the theater at Caesarea, where Israeli musicians will perform.

Federal Republic of Germany Pavilion: German architecture highlights the pavilion filled with themed shops. There will be a cruise down Germany's most famous rivers—the Rhine, the Tauber, the Ruhr and the Isar.

Detailed miniatures of famous landmarks will also be seen, including one of the Cologne Cathedral. Also planned is an authentic beer garden. Working artists and craftsmen will demonstrate their crafts.

Canada Pavilion: Based on an outdoors theme which re-creates the majesty of the Canadian wilderness, the pavilion features a Northwest Indian village, a suspension bridge spanning a "bottomless" river gorge and a steep mountain path. Guests will also be able to visit the Chateau Frontenac Hotel in the heart of French Quebec, where the street is lined with shops filled with gift items from Canada.

All roads in the pavilion converge on Salmon Island where the rugged natural beauty of the Canadian outdoors stands alone, with waterfalls, tall pine trees, an abandoned mine tunnel and a Canadian CircleVision Theater. Also featured will be a Klondike-era frontier tavern.

PEAK ATTENDANCE: August 12, 1978 saw 69,835 guests visit Disneyland, the highest single day attendance of the year.

Disneyland

Disneyland's total attendance reached 10,807,000 during fiscal 1978, the fourth consecutive year of attendance growth and the highest total attendance figure in the Park's 23-year history.

The re-opening of the Matterhorn, which now features ice caverns, a snowstorm and the Abominable Snowman; the continued popularity of Space Mountain; the return of the Electrical Parade; and the inclusion of a new multi-media stage show, "The Magnificent Music in Motion Machine," all contributed to Disneyland's most successful summer ever.

Revenues for the fiscal year were a record-breaking \$158,274,000, up 13% from 1977.

Foreign guest attendance rose 14.8% over last year perhaps due in part to the favorable currency exchange rate. Domestically, out-of-state attendance was up 10.5%, generally due to the lower air fare rates offered by the nation's major airlines. Fiscal 1978 had the rainiest season in California in 88 years and local attendance declined slightly for the period.

*Construction continued on Big Thunder Railway, with the new Frontierland attraction scheduled to open in the summer of 1979.

Mickey's 50th birthday was celebrated all year long, with a daily "Happy Birthday Mickey Mouse" parade and topped by a giant weekend birthday party on November 18 and 19, with free admission to those born in 1928, an 8-foot cake, appearances by the original and new Mouseketeers, free posters and special entertainment.

Gross Revenues				
1978	1977*	1976*	1975*	1974*
Disneyland				
Admissions and rides\$ 70,909,	000 \$ 65,913,000	\$ 57,013,000	\$ 53,360,000	\$ 48,947,000

Celebrity Sports Center and				
Walt Disney Travel Co\$ 4,532,	000 \$ 4,092,000	\$ 3,754,000	\$ 2,980,000	\$ 2,316,000

^{*}Reclassified for comparative purposes and to comply with reporting for business segment requirements adopted in 1978.

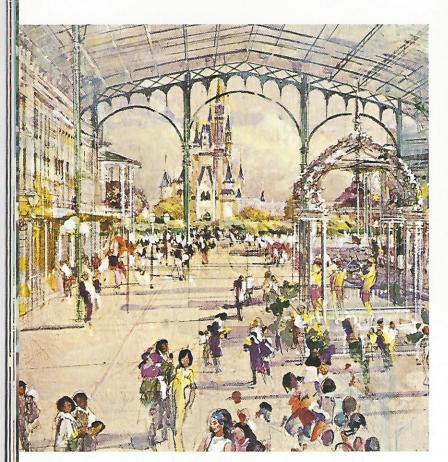

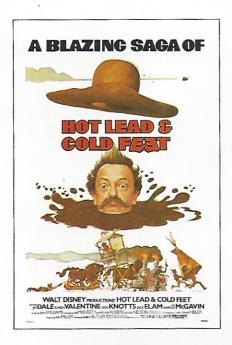

Tokyo Disneyland

Currently, a final definitive agreement with Mitsui Real Estate Development Co., Ltd. and Keisei Electric Railway Co. Ltd. to proceed with Tokyo Disneyland is being negotiated which calls for the park to open in the spring of 1982 at an initial cost of approximately \$300 million.

Located on Tokyo Bay about 8 miles from downtown Tokyo, the project is anticipated to host some ten million guests during its first full year of operation. Tokyo Disneyland, which will be similar in size and concept to Disneyland, will consist of five theme areas: Adventureland; Fantasyland; Westernland; Tomorrowland; and the World Bazaar, an area akin to Disneyland's Main Street.

We will master plan and design the project as well as provide guidance with regard to construction and operational aspects. We have agreed to invest \$2.5 million in the equity of the Japanese company which will be formed to own and operate Tokyo Disneyland. This will represent 10% of the total equity of \$25 million contemplated for the company. However, the financing requirements will be the responsibility of the Japanese interests. We will receive a royalty on the gross revenues generated from the Park on rides and admissions, food, beverages and merchandise as well as a participation in future peripheral area development.

OVERSEAS ORVILLE: H.R.H. Prince Charles meets "The Rescuers" albatross star at the East of England Show in Peterborough, England.

Motion Picture and Television Distribution

Worldwide film rentals, including television, reached a record level in fiscal 1978, increasing 29% to \$152,135,000.

Domestic theatrical revenues increased 18% to \$69,010,000, while foreign theatrical revenues climbed to \$57,912,000, up 58%.

The phenomenal success of "The Rescuers" in Germany, France and other overseas markets led the way for the Company's foreign releases. This new animated feature has now outperformed every film in Disney history, establishing a record for foreign film rentals of \$31,200,000, and displacing 1964's "Mary Poppins" as the Company's top grossing picture, with estimated film rentals of \$45,400,000 in its initial worldwide release. During 1978, "The Rescuers" became the number one all-time film in Germany as well as the first place motion picture for the year in France, with more than one million admissions in Paris alone.

In addition, our third "Herbie" film, "Herbie Goes to Monte Carlo," turned in a fine foreign performance. With estimated foreign film rentals of \$15,000,000, it is now the Company's most successful live-action foreign release.

Domestically, the Disney program of film releases included a surprising performance this summer from "Hot Lead and Cold Feet" which achieved the excellent result of \$9,900,000 in estimated film rentals. The first reissue of the animated classic, "The Jungle Book," received an enthusiastic reception from American and Canadian families, bringing estimated domestic film rentals of \$13,000,000, while the summer's other new release, "The Cat From Outer Space," also turned in a good performance.

This fall, the Company released a special Mickey Mouse Birthday Celebration Show featuring "Davy Crockett, King of the Wild Frontier" plus five Mickey Mouse cartoons.

In television, domestically, we are continuing our efforts to revitalize our Sunday night show, "The Wonderful World of Disney." This year, for the first time, we presented three made-for-TV features and in September the show began its recordbreaking 25th season, kicked off by a two-hour NBC salute, followed by a showing of the 1941 classic "Dumbo." The new year continues this energetic schedule with a 90-minute all star special "Mickey's 50" which aired on November 19, 1978 and "The Walt Disney World Christmas Special," another special which was broadcast during the holiday season.

In foreign distribution, Disney television programs continue to be enjoyed by families from more than 58 countries.

Gross Revenues					
1:	978	1977	1976	1975	1974
Theatrical					
Domestic \$ 69,	010,000	\$ 58,723,000	\$ 60,535,000	\$ 61,224,000	\$ 48,586,000

Television					
Worldwide	213,000	22,750,000	18,808,000	13,720,000	11,932,000
Total revenues	135,000	\$118,058,000	\$119,133,000	\$112,528,000	\$ 90,390,000

THE SMALL ONE: A new generation of animators joined forces with veteran Disney artists to produce this touching Christmas featurette.

THE NORTH AVENUE IRREGULARS: A band of hilarious housewives turn "private eye" in this new comedy set for February release.

101 DALMATIANS: This ever-popular animated feature returns to screens this summer.

THE APPLE DUMPLING GANG RIDES AGAIN: A talented comedy team returns to the scene to highlight this summer's western spoof.

PINOCCHIO: A milestone in the art of animation is reissued especially for this Christmas season.

MOTION PICTURES: 1979:

A year of Disney magic, music and mirth

The classic beauty and charm of "Pinocchio," rereleased at Christmas, leads the Company's extremely strong lineup of films for 1979, with several important new features debuting throughout the United States and Canada this year.

Paired with "Pinocchio" for the holiday season is "The Small One," an animated featurette that showcases the talents of a whole new generation of Disney animators. Destined to become a holiday favorite, "The Small One" is the heartwarming tale of a young boy in ancient Nazareth who must sell his beloved donkey on the eve of Christ's birth.

The remainder of the schedule for 1979 is as follows: THE LOVE BUG: The classic comedy that first introduced a loveable Volkswagen named Herbie returns to motion picture screens once again. Dean Jones, Michele Lee, Buddy Hackett and David Tomlinson lend their considerable talents to this hilarious story of the car with a mind of its own. Bill Walsh produced and Robert Stevenson directed this January 1979 re-release.

* NORTH AVENUE IRREGULARS: All heaven breaks loose when the newly appointed minister of a small town clashes head-on with a major crime syndicate and organizes his female followers into a crimebusting squad. Based on a true story, the madcap comedy stars Edward Herrmann, Susan Clark, Cloris Leachman, Barbara Harris, Karen Valentine, Patsy Kelly and Virginia Capers. Ron Miller and Tom Leetch produced and Bruce Bilson directed. Release date: February 1979.

BEDKNOBS AND BROOMSTICKS: A dazzling combination of live-action and animation, this 1979 Easter re-release stars Angela Lansbury as an amateur witch determined to magically save World War II England from a foreign invasion. Joined by a bogus professor of witchcraft and three Cockney kids, she whisks off to a musical fantasyland called Naboombu. The film, with music by Oscar-winners Richard M. and Robert B. Sherman ("Mary Poppins") returns to screens for the first time since its initial release.

101 DALMATIANS: This summer's re-release is sure to capture hearts anew as the Disney animators bring to life a screenful of loveable pups and one of the Company's most memorable villains. Production design by veteran Disney artist Ken Anderson. Directing animators included Milt Kahl, Marc Davis, Ollie Johnston, Frank Thomas, John Lounsbery and Eric Larson, all part of the famed "Nine Old Men." Another member of that team, Wolfgang Reitherman, served as one of the film's directors.

LADY AND THE TRAMP; Always a favorite, this animated classic returns at Christmas. 1979.

THE APPLE DUMPLING GANG RIDES AGAIN: Tim Conway and Don Knotts reprise their roles as the two bumbling outlaws of 1975's hit comedy, "The Apple Dumpling Gang." This time out they bungle a bank job, join the Army and destroy an entire fort before riding off into the sunset. The top-notch cast also stars Tim Matheson, Elyssa Davalos, Jack Elam, Harry Morgan, Kenneth Mars and Ruth Buzzi. The summer release was produced by Ron Miller and Tom Leetch and directed by Vince McEveety.

THE SPACEMAN AND KING ARTHUR: Filmed on location at an 11th Century castle near London, England, this innovative comedy uses a spectrum of special effects to help tell the tale of a 20th Century scientist who is transported back to the legendary days of King Arthur. Dennis Dugan stars as the scientist, with Kenneth More as the King, Jim Dale ("Pete's Dragon," "Hot Lead and Cold Feet") as an evil knight, Ron Moody as Merlin the magician, John LeMesurier as Sir Gawain and Sheila White as the lovely damsel, Alisande. Russ Mayberry directed the summer release for producer Ron Miller and associate producers Don Tait (who also wrote the script) and Hugh Attwooll.

THE HAPPIEST MILLIONAIRE: One of Disney's happiest musicals, starring Fred MacMurray, Tommy Steele, Greer Garson, Geraldine Page, Lesley Ann Warren and John Davidson, the song-filled comedy returns in its first re-release. Philadelphia, circa 1916, provides the picturesque setting for this story of an eccentric millionaire and his family. Music is by Richard M. and Robert B.

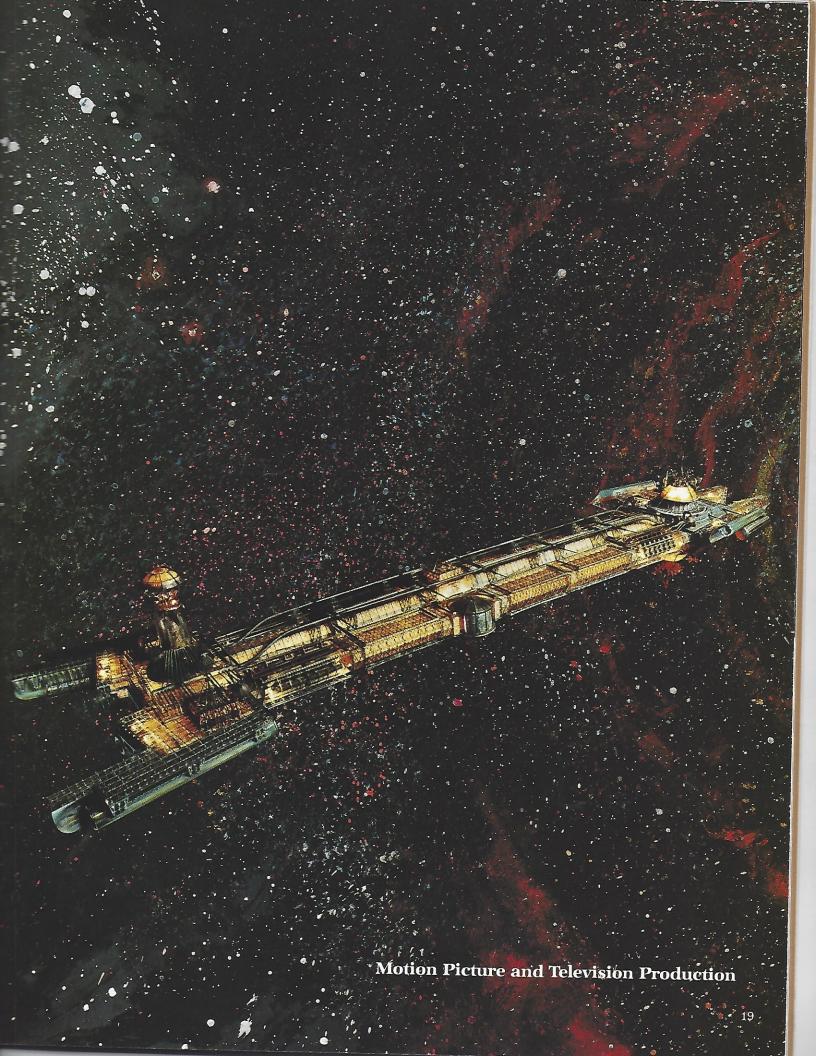

THE SPACEMAN AND KING ARTHUR: Modern-day technology meets medieval villainy with hilarious results in this summer release.

Sherman. Bill Anderson co-produced and Norman Tokar directed this fall re-release.

LADY AND THE TRAMP: Perhaps the most romantic of the Company's animated films, this touching tale of a rough-and-tumble mutt and his love for a refined "lady" spaniel features the finest of Disney animation and music by songstress Peggy Lee. The first all-cartoon feature to be made in Cinemascope, "Lady and the Tramp" is expected to be well received by audiences during its broad re-release at Christmas 1979.

THE BLACK HOLE: This enormously exciting project, which is discussed in detail later in this report, is scheduled for release on a limited basis at Christmas 1979.

DRAMATIC ANNOUNCEMENT: The studio's most ambitious film production is introduced to the entertainment industry.

On October 11, 1978, we began production of the most ambitious motion picture in the history of the Disney studio, "The Black Hole." Nearly everything about this mammoth undertaking sets it apart from our efforts of the past.

"The Black Hole" has the largest budget we have ever committed to a film project, more than 17 million dollars

All but one of the principal cast are newcomers to the Disney family, including Maximilian Schell, Anthony Perkins, Robert Forster, Joseph Bottoms and Ernest Borgnine. Yvette Mimieux, who joins this excellent team of actors, has appeared for us only once before.

Director Gary Nelson, nominated for an Emmy for ABC-TV's "Washington: Behind Closed Doors," will oversee the longest production schedule in the history of Disney live-action filming. Nearly 14 months of simultaneous and post-production filming and processing will be required.

The entire studio creative team plus a group of "Imagineers" at WED Enterprises and four Academy Award winners (Peter Ellenshaw, Production Design; Eustace Lycett and Art Cruickshank, Special Photographic Effects; and Danny Lee, Special Visual Effects) are working together to create one of the most exciting films ever made. To accomplish this, an all-new computer camera system known as ACES (Automated Camera Effects System) has been developed and, in some scenes, as many as 12 different photo processes will be on the screen at once.

Black holes are the universe's ultimate phenomena. Neither the science nor imagination of man has provided answers to the questions they pose. Some say that time stops as one enters the mouth of these dragons of space. Others suggest they are doorways to another universe. Most simply refuse to speculate. And yet this is where our story begins: At the edge or event horizon of a black hole.

With the release of "The Black Hole," scheduled tentatively for Christmas 1979, we anticipate a major new addition to the Disney library of classic films.

During 1979 we are also planning production of several other exciting projects. Co-producer Jan Williams is now preparing "The Last Flight of Noah's Ark." Scheduled for filming in the spring, this action-adventure tells the story of a plane load of passengers—including a woman missionary, two stowaway orphans and a menagerie of animals—who crash land on a deserted South Pacific island. With the aid of two Japanese sailors, stranded on the isle since World War II, they turn a wrecked B-29 into a modern day Noah's Ark in an attempt to escape the island.

Mary Rodgers who wrote "Freaky Friday" has provided us with another excellent screenplay in "Miracle Max." Jerry Courtland will co-produce this humorous story of a man who is given the chance to save his soul providing he can recruit three replacements for the devil.

"A Watcher in The Woods," will be produced by Tom Leetch. Under the eyes of a watching alien, a threatened teenaged girl and her family solve a fifty-year-old enigma in this mystery thriller with elements of science fiction.

Love and adventure will lure Herbie to exotic South America in "Herbie Goes Bananas." Written by Don Tait, this fourth outing for the popular car star finds Herbie risking life and carburetor to be reunited with his beloved Lancia, narrowly averting being converted into a dune buggy along the way. A valuable archeological find, the charged atmosphere of Rio's Carnival and an exciting jungle escape are all part of the high octane humor Herbie has in store for his audiences.

Co-producer Jan Williams is working with writer Marc Stirdivant to develop "Condor Man," a contemporary adventure comedy introducing the zaniest spy alive, comic book writer Woody Wilkins. In this, his first assignment, Woody assumes the identity of his comic crea-

THE SECRET OF LOST VALLEY: One of several made-for-television movies produced by the Studio for "The Wonderful World of Disney."

tion Condor Man to escort a defecting Russian agent from behind the iron curtain. Using all the crazy gimmicks and contraptions he has invented in his comics, the writer-turned-superhero travels around the world to keep himself and the agent, an attractive female, out of enemy hands.

In addition to this strong production line-up for 1979, we are continuing to make excellent progress on our next animated feature, "The Fox and The Hound." Release for this new full-length cartoon is scheduled for Christmas, 1980.

For the 1978–79 season of "The Wonderful World of Disney" we are now developing several new properties. In "The Secret of Lost Valley," an exciting adventure of survival, a family camping trip turns into a nightmare when a 12-year-old boy becomes lost in the wilderness. Three youngsters, playing detective, get involved in a case of international intrigue that threatens not only their own lives but the very peace of the world in "The

Whisper in the Gloom." A comedy-adventure set in the Southwest of 1910, "Digger," features a wildly inventive black man, a custom-built automobile and a race to catch a villian who is an ingenious master of disguises. "Run Far, Run Fast," is the story of an orphaned 16-year-old boy who runs into timber 'rustlers' when he runs away.

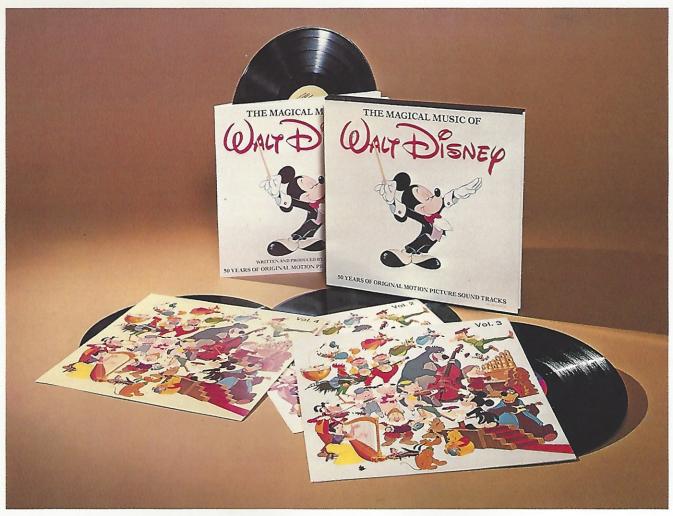

Once again, I would like to express my appreciation for the support I continue to receive from our entire creative team at Walt Disney Productions. With their help I am convinced that these new projects will meet the challenge of providing the finest in family entertainment.

Ron Miller

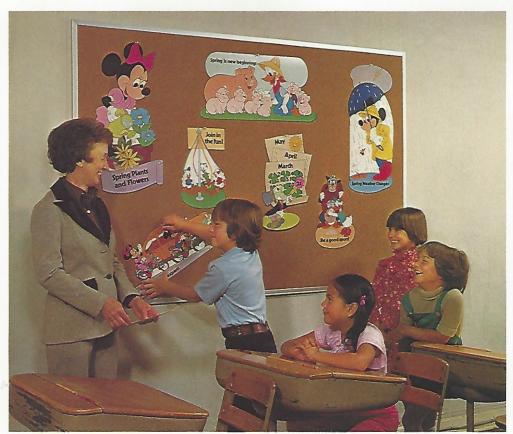

Executive Vice President, Production and Creative Affairs

Consumer Products and Other

50 YEARS OF MUSIC: Ovation Records released this impressive 4-record set for Mickey's 50th birthday.

DISNEY SCHOOLHOUSE: A new line of low-cost teaching aids from WDEMCO debuted this year.

DELUXE FILM PACKAGE: Mickey Mouse's career is recalled on Super 8 sound film in this commemorative album from WDEMCO.

Mickey's 50th birthday and greatly increased character merchandising and publications activities provided the impetus for the most successful year of the Consumer Products Group, with revenues of \$80,564,000, up 21% over the previous year.

Some 140 licensees participated in the massive Mickey's 50th retail promotion, with over 20,000 outlets nationwide involved in displaying and promoting Disney-licensed merchandise. This immense effort was backed by personal appearances in nearly 50 major markets by our costumed characters, 40,000 point-of-sale displays and a giant sweepstakes contest. Similar promotions occurred simultaneously in countries around the world.

Character Merchandising and Publications revenues increased 19% to \$36,404,000 capping a decade of steady growth.

New deluxe book items include the recently published Disney's "America" from Abbeville Press; "Treasury of Children's Classics" (Harry N. Abrams, Inc.), featuring art from 17 classic Disney animated films; a \$200 art book on "Snow White and the Seven Dwarfs," published by Circle Galleries; a continuing expansion of Disney book clubs to 1,200,000 a month world-wide; and multi-million dollar revenues from direct mail projects in 14 countries.

Records and *Music Publishing* revenues increased 24% to \$17,218,000, with domestic record sales reaching their highest level.

"Pete's Dragon" sold over 600,000 record units, and the warm theatrical reception to "The Jungle Book" re-release generated record sales in excess of 400,000 units.

New products include "The Magical Music of Walt Disney," on the Ovation Records label, an official commemorative album for Mickey's 50th birthday, and the recently released "Small One" Storyteller album.

Music Publishing has reached agreement with The Big 3 Music Corporation for them to print and distribute Disney's music publications. A complete new halftime show package for high school and marching bands,

themed to Mickey's 50th birthday, was successfully marketed during the year.

The continued success of all three operating divisions of the Walt Disney Educational Media Company (WDEMCO) was reflected in its 20% growth to revenues of \$24,809,000 for the year. Revenues for Super 8mm home movies rose 13%, largely due to WDEMCO's continuing development of a strong domestic sales organization. Non-theatrical film rentals also had a record year, increasing 22%. This increase was largely based on the success of its direct sales program. The educational film and materials division increased 23%, an especially impressive record in a declining market.

There were a number of other highlights to the year. During the summer, WDEMCO announced an arrangement whereby it became the exclusive worldwide distributor for all filmstrips of The Cousteau Society and also to the award-winning "Cousteau Odyssey" film series.

An entirely new line of classroom materials dubbed "Disney Schoolhouse" was introduced in August. These low-cost items, including bulletin board kits, duplicating spirit master books, and reward stick-ons in a variety of subjects are expected to contribute significantly to overall WDEMCO revenues in the future.

MICKEY MOUSE, THE FIRST 50 YEARS—a Super 8mm home movie retrospective of Mickey Mouse's career was released in conjunction with the star's 50th birthday. This limited edition collector's film is destined to be one of the largest selling home movies of all time.

Five million copies of a new comic book MICKEY MOUSE AND GOOFY EXPLORE ENERGY CONSERVATION, were distributed by Exxon, U.S.A. to educators and students nationwide, following the enormous success of last year's MICKEY MOUSE AND GOOFY EXPLORE ENERGY comic book, which was part of an innovative multimedia kit. A third comic book, MICKEY AND GOOFY EXPLORE BUSINESS, will be available as part of a new multimedia kit, DISNEY'S WIDE WORLD OF ECONOMICS AND ENTERPRISE, in 1979.

The International Division of WDEMCO also performed well, accounting for approximately one-third of the company's activity.

Gross Revenues	1978	1977*	1976*	1975*	1974*

*Reclassified for comparative purposes and to comply with reporting for business segment requirements adopted in 1978.

Financial Review

The financial statements and notes provide information about operating results, financial position and changes therein for the fiscal years 1978 and 1977. Operating results for 1978 are compared with 1977 by business segment in the forepart of this report together with summaries of revenues for the last five years.

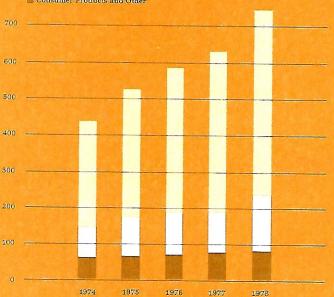

Certain of the financial information in this report has been reclassified in order to comply with Statement of Financial Accounting Standards No. 14—Financial Reporting for Segments of a Business Enterprise. The revenues and costs and expenses of Lake Buena Vista Communities and Walt Disney World Village have been classified with the Entertainment and Recreation segment (previously under Consumer Products and Other), and certain general and administrative costs and expenses have been allocated to the segments (previously classified as Corporate Expenses). A description of the Company's business segments can be found under Summary of Significant Accounting Policies.

ANALYSIS OF OPERATIONS

The following analysis is presented to assist the reader in an understanding and evaluation of the material periodic changes in the various items of the Summary of Operations (page 38) (tables are in thousands of dollars, except earnings per share).

REVENUES (In millions of dollars)

- ☐ Entertainment and Recreation
- ☐ Motion Pictures
- Consumer Products and Other

In summary. Revenues and income in 1978 and the two prior years were:

	1978	Change	1977	Change	1976
Revenues Operating income (before corporate	\$741,143	+ 18%	\$629,825	+ 8%	\$583,896
expenses) Net income Per share	197,540 98,385 \$3.04	+ 17% +20%	169,500 81,947 \$2.53	+ 12% + 10%	151,924 74,599 \$2.30

In detail. An analysis of these results by business segment and corporate expense follows:

Entertainment and Recreation

	1978	Change	1977	Change	1976
Revenues	\$508,444 105,952	+ 14% + 15%	\$445,165 92,062	+ 11% + 31%	\$401,613
Theme park attendance-	100,332	T 1570	92,062	+ 31%	70,423
combined	24,878	+4.8%	23,735	+1.8%	23,318

Revenues and Operating Income increased in 1978 due to increased attendance and per capita spending at both Disneyland and Walt Disney World, increased occupancy and per capita spending at the resort hotels at Walt Disney World, and expanded business activities at Lake Buena Vista Communities, including the Walt Disney World Village. Theme park per capita spending was influenced by admission media price increases averaging six percent at Walt Disney World in June 1978. Theme park and resort hotel costs and expenses in 1978 increased primarily due to increases in labor costs which are attributable to higher union rates and the number of man-hours worked. Gross profit margins for food and merchandise activities were maintained. Overall operating margins decreased slightly in the theme parks and resort hotels.

Revenues and Operating Income increased in 1977 due to increased attendance at Disneyland, increased per capita spending at both Disneyland and Walt Disney World, and increased revenue-producing activities at Lake Buena Vista Communities and the Walt Disney World Village. Theme park per capita spending was influenced by admission media price increases averaging eight percent at Disneyland in May 1977 and six percent at Walt Disney World in June 1977. Theme park and resort hotel labor costs increased due to higher union rates, but were offset in part by effective cost controls resulting in a reduction in man-hours worked. Other increases in costs and expenses were experienced in depreciation, property taxes and utilities, caused in part by the addition of new attractions in the previous two years. Gross profit margins for food and merchandise improved for the year.

Motion Pictures

	1978	Change	1977	Change	1976
Revenues	\$152,135	+ 29%	\$118,058	-1%	\$119,133
Operating income	54,119	+ 17%	46,094	- 14%	53,801

Motion picture production and distribution is a highly competitive business, wherein the public's reaction to a given motion picture can have a major impact on the success of that product and, hence, a significant impact on the motion picture business for any particular year. Whereas the Company experienced a one percent decrease in total motion picture revenues in 1977, theatrical revenues rebounded to record levels in 1978, led by the high grosses realized from the initial release of "Pete's Dragon," the first reissue of "The Jungle Book" and the outstanding success of "The Rescuers" in the foreign market, far exceeding what the picture had done domestically a year earlier.

The Company's television revenues are increasing due primarily to additional theatrical features being made available for television viewing, as well as to feature motion pictures that are being made specifically for television.

The major areas of cost in motion picture distribution are the amortization of film negative costs (which is explained more fully under Summary of Significant Accounting Policies) and distribution expenses. Amortization of negative costs is up significantly in 1978, due in part to higher production costs applicable to the current year's new theatrical releases, as well as higher television production costs. In addition, the Company has written down the cost of producing the New Mickey Mouse Club television program during the year to its expected net realizable value. Domestic and foreign distribution expense increased in 1978 due primarily to the increase in the theatrical business.

The decrease in Operating Income in 1977 was due primarily to higher amortization of negative costs attributable to higher production costs of theatrical and television films currently in release.

Consumer Products and Other

	1978	Change	1977	Change	1976
Revenues Operating income	\$80,564 37,469	+21% +20%	\$66,602 31,344		\$63,150 27,700

The character merchandising and publications, records and music publishing, and educational media divisions, comprising the Consumer Products business segment of the Company, all produced improved operating results both in 1978 and 1977. The most significant growth in 1978 was experienced with character merchandising and publications, particularly in the foreign market where licensing activities continued to expand (due in part to the theatrical success of "The Rescuers") and new product (including that which has been successful in this country in past years) was being introduced in publications activities.

An improvement in the operating margin for character merchandising and publications also contributed to higher operating income for the segment in 1977.

General and Administrative Expense

	1978	Change	1977	Change	1976
Amount	\$17,212	+ 3%	\$16,754	+ 38%	\$12,113
revenues	2%		3%		2%

Corporate general and administrative expense represents those functions and services which are not allocable to costs and expenses of operations, and include corporate management, corporate finance, management information services pertaining to systems development and programming, corporate retail merchandising, corporate marketing and certain other expenses. Other general and administrative services (including legal, accounting, employee relations, data processing operations and facilities-use costs) have been allocated to the business segments and to General and Administrative Expense.

The Company has experienced the normal cost increases in labor, materials and supplies. In 1977, such increases were accompanied by increased EPCOT Center marketing costs and the creation of the corporate retail merchandising activities.

All costs pertaining to both the Mineral King and Independence Lake projects have been charged against income as incurred.

Design Projects Abandoned

	1978	Change	1977	Change	1976
Amount	\$3,311	+90%	\$1,740	- 45%	\$3,182

At the close of each fiscal quarter, management evaluates projects in the concept and design stages which have been in progress for varying periods of time. Those which are determined to have no future use are abandoned. Additional information on design projects in progress is given in Note 2 of Notes to Consolidated Financial Statements.

Interest Income-Net

	1978	Change	1977	Change	1976
Amount	\$12.468	+ 97%	\$6.341	± 780/	\$2 570

The Company has realized net interest income (after interest expense) from short term investments, such income being dependent upon variances in interest rates and the amount of such investments. (See discussion under total assets below.) Interest expense amounted to \$2,017,000, \$278,000 and \$175,000 for fiscal years 1978, 1977 and 1976, respectively. The increase in interest expense in 1978 was due to the tax settlement with the Internal Revenue Service for fiscal years 1974 and 1975.

Taxes on Income

	1978	Change	1977	Change	1976
Amount	\$91,100	+ 21%	\$75,400	+ 15%	\$65,600
on income	48.1%		47.9%		46.8%

A full explanation of the provisions for taxes on income for 1978 and 1977 is given in Note 3 of Notes to Consolidated Financial Statements.

The tax portion of the settlement referred to under Interest Income-Net, amounted to \$6,573,000. This amount had been substantially provided for in prior years and resulted in a decrease in Deferred Taxes on Income and Investment Credits of \$5,391,000 and a corresponding increase in Taxes on Income (under current liabilities).

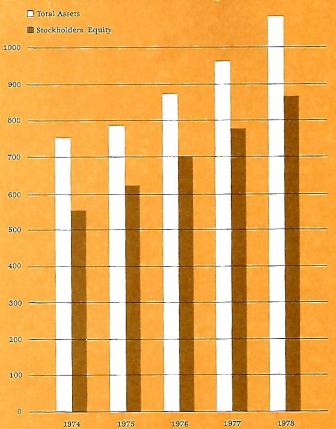

HIGHLIGHTS OF FINANCIAL GROWTH

(tables are in thousands of dollars, except per share data)

Total assets. For the first time in its history, the Company has exceeded one billion dollars in total assets. The increase in assets of 12.3% in 1978 is reflected predominantly in short term investments.

Short term investments of \$278,281,000 at September \$30,1978 consist primarily of Bankers Acceptances, negotiable Certificates of Deposit and various United States Government issues. They have an average matur-

TOTAL ASSETS AND STOCKHOLDERS EQUITY (in millions of dollars)

ity of 111 days and a weighted average yield at cost of 8.23%. It is contemplated that an undesignated amount of these funds may be used to finance the EPCOT Center project.

Financial position. The Company's financial position continues to improve, with working capital provided from operations (sometimes referred to as cash flow) increasing by 11% to \$148,081,000 for 1978.

	1978	Change	1977	Change	1976
Working capital provided from					
operations	\$148,081	+11%	\$133,096	+3%	\$128,699

The Company is virtually debt-free and has had no borrowings since 1975 against an available unsecured revolving line of credit of \$50,000,000.

Cash dividends. In recognition of the changing investment climate and the Company's present strong position, the Board of Directors has doubled the quarterly cash dividend rate in the past year.

	1978	Change	1977	Change	1976
Cash dividends	\$10,273	+ 117%	\$4,725	+29%	\$3,659
Percent of net income	10.4%		5.8%		4.9%
Per chare	\$ 32		\$ 15		\$ 12

Capital and motion picture additions. The Company continues to enhance and to expand its productive capacity, particularly at Disneyland and Walt Disney World. Similarly, film production activities continue to provide new product for the theatrical and television markets while increasing the value of the Company's film library.

	1978	Change	1977	Change	1976
Additions to					
property, plant and equipment	\$45,367	+ 2%	\$44,517	+ 2%	\$43,708
Additions to film	\$32,716	+ 6%	\$34,699	-2%	\$35,559

The Company currently anticipates that expenditures during Fiscal 1979 will approximate \$70,000,000 and \$55,000,000 for capital additions and film production, respectively. The significant increase in capital additions is due to the initial development of the EPCOT Center and the increase in film production is attributable to the production of "The Black Hole."

Stockholders equity. Total stockholders equity has increased at the compounded average rate of 10.9% per year for the last five years.

	1978	Change	1977	Change	1976
Stockholders equity . Per share	\$861,235 \$26.58	+12%	\$771,206 \$23.82	+ 11%	\$692,382 \$21.36

Market price and dividend data. The principal market for trading Walt Disney Productions common

stock is the New York Stock Exchange. Market data (adjusted for stock dividends) and dividend data by fiscal quarters for the past two years were:

Magnitude of taxes paid. The Company incurred in excess of \$118,000,000 in taxes—on income, property and employment—in fiscal year 1978. This tax burden has increased 48% in just two years.

	1978	Change	1977	Change	1976
Income, property and					
employment taxes	\$118,500	+29%	\$91,700	+ 15%	\$79,800
Percent of income					
before taxes	55%		53%		52%

In addition to these taxes, which are absorbed by the Company, \$64,300,000 was collected from customers and guests or withheld from employees and passed on to various governmental agencies during fiscal year 1978.

NET INCOME (in millions of dollars)

Walt Disney Productions and Subsidiaries Summary of Significant Accounting Policies

WALT DISNEY PRODUCTIONS is a diversified international company engaged in family entertainment and operates in three business segments:

Entertainment and Recreation

The Company operates an amusement theme park, "Disneyland" in California; a destination resort, "Walt Disney World" in Florida; and a recreational facility, "Celebrity Sports Center" in Denver, Colorado. In addition to an amusement theme park, the Walt Disney World complex includes three hotels, camping, golfing and other recreational facilities, a shopping village and other lodging accommodations.

Motion Pictures

The Company produces motion pictures for theatrical and television distribution, including both network and independent television station broadcasting. The Company distributes its filmed product through its own distribution company in the United States and through foreign subsidiaries in certain countries and independent distribution companies throughout the rest of the world.

Consumer Products and Other

The Company licenses the name Walt Disney, its characters, its literary properties and its songs and music to various manufacturers, retailers, printers and publishers. The Company also produces, manufactures and distributes phonograph recordings, 8 millimeter prints of excerpts from its film library, 16 millimeter prints of product taken from the film library or developed on educational subjects, and a broad range of teaching aids. These activities are conducted through the character merchandising and publications, records and music publishing, and educational media divisions and subsidiaries of the Company.

The following summary of the Company's significant accounting policies is presented as an integral part of the financial statements.

PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its domestic and foreign subsidiaries, substantially all wholly owned.

FILM PRODUCTION COSTS AND AMORTIZATION

Costs of completed theatrical and television film productions (negative costs), together with applicable capitalized exploitation costs, are amortized by charges to income in the proportion that gross revenue received by the Company during the year for each production bears to the estimated total gross revenue to be received. Estimates of total gross revenue are reviewed periodically and amortization is adjusted accordingly. When unamortized cost exceeds the estimated producers share

of film rentals, the carrying value of the film is adjusted to net realizable value.

INVENTORIES

Costs of merchandise, materials and supplies inventories are generally determined on the moving average basis and are stated at the lower of cost or market.

PROPERTY, PLANT AND EQUIPMENT

The Company, at any one point in time, will have a number of projects in the concept, design, or construction phases related to entertainment attractions, buildings and equipment. All projects in progress are evaluated on a continuing basis and upon completion costs of major replacements and betterments are capitalized. When it is determined that a project in progress has no future use, the costs of such project are charged to income under the caption "Design Projects Abandoned."

Depreciation is provided principally on the straight line method using estimated service lives ranging from four to fifty years. Depreciation and maintenance and repairs are charged either directly to costs and expenses as incurred or to film production costs which are then amortized against income. The cost and related accumulated depreciation of property sold or retired are removed from the accounts and any resulting gain or loss is recorded in income.

TAXES ON INCOME

Taxes are provided on all revenue and expense items included in the consolidated statement of income, regardless of the period in which such items are recognized for income tax purposes, except for items representing a permanent difference between pretax accounting income and taxable income. Investment tax credits, accounted for by the deferral method, are amortized as a reduction of the provision for taxes on income over the average service lives of the related assets.

STOCK OPTIONS

Proceeds from the sale of common stock issued under stock option plans are accounted for as capital transactions and no charges or credits are made to income in connection with the plans.

EARNINGS PER SHARE

Earnings per common and common equivalent share are computed on the basis of the average number of shares outstanding during each year, retroactively adjusted to give effect to all stock splits and stock dividends. It is assumed that all dilutive stock options are exercised at the beginning of each year and that the proceeds are used to purchase shares of the Company's common stock at the average market price during the year.

Walt Disney Productions and Subsidiaries Notes to Consolidated Financial Statements

NOTE 1

Inventories—Film Production Costs:

Inventories of theatrical and television film productions consist of the following components:

	1978	1977
Released, less amortization	34,979,000 6,677,000 31,619,000	\$ 38,977,000 22,492,000 19,178,000
Less: Non-current film	73,275,000	80,647,000
production costs	40,822,000	31,953,000
Current film production costs	\$ 32,453,000	\$ 48,694,000

Non-current film production costs include costs of theatrical and television films in process of production, portions of completed theatrical film costs allocated to television and portions of completed television film costs allocated to foreign markets.

NOTE 2

EPCOT Center Project:

On October 2, 1978, the Company announced its plans to proceed with the design and construction of the EPCOT Center at Walt Disney World, with an anticipated opening of October 1982. The cost of the project, which will consist of two major themed areas, Future World and the World Showcase, is currently estimated at five hundred million dollars. It is contemplated that an undesignated amount of the short term investments held by the Company may be used to fund the project, together with payments by participants and cash generated from future operations.

Construction and Design Projects in Progress include design costs for the EPCOT Center of \$13,223,000 at September 30, 1978 (\$7,426,000—1977). Marketing costs related to the project are expensed as they are incurred.

NOTE 3
Taxes on Income:

The provision for taxes is composed of the following:

	1978	1977
Currently payable		
—Federal	75,506,000	\$ 57,385,000
—State	8,298,000	6,030,000
—Foreign	3,975,000	3,824,000
Deferred		
—Federal	6,619,000	10,426,000
—State	602,000	735,000
—Investment credits amortized	(3,900,000)	(3,000,000)
\$	91,100,000	\$ 75,400,000

The significant components of deferred taxes on income included in the provision for taxes on income are as follows:

	1978		1977	
Excess of tax over book				
depreciation	\$	6,262,000	\$	9,068,000
Difference between investment credits				
claimed for tax purposes and				
amortization under deferral method				
for financial reporting purposes		(988,000)		399,000
Other		(1,953,000)		(1,306,000)
Total provision for deferred				
taxes on income	\$	3,321,000	\$	8,161,000

The difference between the U.S. federal income tax rate of 48% and the Company's effective income tax rate is explained below:

	1978	1977
Federal income tax rate State income taxes, net of federal	48.0%	48.0%
income tax benefit	2.4	2.2
Investment tax credits Other	(2.1) (.2)	(1.9) (.4)
Effective income tax rate	48.1%	47.9%

Net deferred taxes of \$9,959,000 at September 30, 1978 (\$7,437,000—1977) are included in taxes on income shown under current liabilities on the balance sheet.

Deferred investment tax credits amount to \$16,671,000 at September 30, 1978 (\$17,659,000—1977).

Federal income tax returns of the Company have been examined by the Internal Revenue Service through fiscal year 1975 and all material matters have been settled and are reflected in the financial statements.

NOTE 4

Employee Benefits:

The Company contributes to various domestic trusteed pension plans under union and industry-wide agreements. Contributions are based on the hours worked by or gross wages paid to covered employees.

The Company has pension plans covering substantially all of its domestic employees not covered by union or industry pension plans. The plans are funded by Company and employee payments to a trust administered by a bank. At June 30, 1978, the date of the latest actuarial evaluation, the market value of the fund's assets exceeded the actuarially computed vested benefits by \$5,496,000. In October of 1978, 1977 and 1976, the Company has prepaid a total of \$8,346,000 to the trust, which represents the actuarially computed past service liability of the plans determined as of June 30. The pre-

paid amounts through September 30, 1978, are deferred in other assets and are being amortized over periods ranging to eleven more years.

The Company has also established a non-qualified and unfunded key employee retirement plan providing for Company and domestic employee contributions. The amount accrued as a long term liability under this plan was \$7,380,000 at September 30, 1978 (\$5,810,000—1977); the actuarially computed unaccrued past service liability at the date of the latest computation was approximately \$4,800,000.

The aggregate amount expensed for all of these plans was \$4,995,000 and \$4,668,000 for fiscal years 1978 and 1977, respectively, including amortization of actuarially computed prior service costs, where applicable, over periods ranging to thirty-four more years.

Stock options are granted to key executive, management and creative personnel at prices equal to market price at date of grant. The options and prices set forth below have been adjusted, where applicable, for all subsequent stock splits and stock dividends.

Transactions under the plans during fiscal year 1978 were as follows:

	Number o	of Shares
	Options Granted	Available For Grant
September 30, 1977		
(\$20.77 to \$86.58 per share)	445,413	320,413
Added for 1.5% stock dividend	11,170	169
Options terminated	(32,655)	30,788
Options granted (\$40.21 and \$40.81		
per share)	317,050	(317,050)
Options exercised (\$20.77 and \$21.08		
per share)	(65,610)	
Contombor 20, 1978		
September 30, 1978 (\$20.77 to \$46.72 per share)	675,368	34,320

Options are exercisable beginning not less than one year after date of grant. Qualified options expire five years after date of grant and non-qualified options expire ten years after date of grant. At September 30, 1978, 6,345 shares granted under the 1967 plan were exercisable at \$43.52 to \$46.72 per share and 234,827 shares granted under the 1973 plan were exercisable at \$20.77 to \$37.84 per share.

Under the Company's 1967 and 1973 stock option plans, \$1,365,000 was received in fiscal year 1978 (\$1,126,000—1977) and credited to common shares for 65,610 and 53,138 option shares exercised in fiscal years 1978 and 1977, respectively. Income tax benefit from sale of option shares by employees of \$552,000 was credited to common shares in fiscal year 1978 (\$476,000—1977).

The Company established, effective in 1976, an Employee Stock Ownership Plan (ESOP) for salaried employees, under the terms of the Tax Reduction Act

of 1975. The Act allows the Company to claim an additional 1% of the Company's qualified capital investments as an investment tax credit if such an amount is paid to a trust which then purchases shares of the Company's stock in the open market for the employees' benefit. Since inception of the Plan, \$450,600 and \$266,200 have been used to purchase 10,730 and 7,211 shares of stock, relating to fiscal years 1977 and 1976, respectively.

NOTE 5

Stockholders Equity:

A 1.5% stock dividend was issued to stockholders of record on December 12, 1977, resulting in the issuance of 475,723 common shares in fiscal year 1978 and in a transfer of \$19,100,000 from retained earnings to common shares. A 3% stock dividend was issued to stockholders of record on December 22, 1976, resulting in the issuance of 922,196 common shares in fiscal year 1977 and in a transfer of \$40,512,000 from retained earnings to common shares.

NOTE 6

Information About the Company's Operations in Different Business Segments:

The Company operates in three business segments: Entertainment and Recreation, Motion Pictures and Consumer Products and Other. These business segments are described in the Summary of Significant Accounting Policies on page 33 of this report.

The Consolidated Statement of Income presents the revenue and operating income by business segment. Additional financial information relative to business segments follows:

Total revenues of \$741,143,000 (\$629,825,000—1977) includes foreign revenues (considered as export sales) related to the following geographic areas:

	1978	1977
Europe	66,824,000	\$ 41,562,000
Western Hemisphere (excluding the United States)	18,545,000 11,202,000	14,538,000 11,619,000
\$	96,571,000	\$ 67,719,000

Walt Disney Productions and Subsidiaries Notes to Consolidated Financial Statements (continued)

Capital expenditures and depreciation expense of property, plant and equipment by business segment were:

	ı	Capital Expenditures	Deprectation Expense	
1978 Entertainment and recreation		43,705,000 1,428,000 32,000 202,000	\$ 37,936,000 705,000 241,000 132,000	
\$		45,367,000	\$ 39,014,000	
1977 Entertainment and recreation	\$	42,741,000 1,297,000 329,000 150,000	\$ 36,372,000 655,000 212,000 121,000	
	\$	44,517,000	\$ 37,360,000	

Amortization expense of film production costs (classified under Motion Pictures) was \$40,088,000 and \$24,730,000 for fiscal years 1978 and 1977, respectively. Identifiable assets by business segment are:

	1978	1977
Entertainment and recreation \$	676,038,000	\$661,900,000
Motion pictures	95,979,000	104,334,000
Consumer products and other	20,978,000	18,721,000
Corporate	290,146,000	179,520,000
\$	1,083,141,000	\$964,475,000
	The second secon	TO THE RESIDENCE OF THE PARTY O

Corporate assets are principally cash and short term investments.

NOTE 7

Commitments and Contingencies:

Pursuant to an agreement for the use of the name of Walt Disney, Retlaw Enterprises, Inc. (a company owned by the family of the late Walter E. Disney) earned royalties of approximately \$5,707,000 and \$4,714,000 from the Company for fiscal years 1978 and 1977, respectively; in accordance with such name agreement, the amounts in fiscal year 1978 included \$3,219,000 (\$2,649,000—1977) as a participation by Retlaw of 5% in the profits, as defined in that agreement, of certain Walt Disney World operations.

Under an agreement with a bank, the Company has available an unsecured revolving line of credit of \$50,000,000 under which the Company maintains on deposit 10% of the committed funds plus 10% of any borrowings. During the year ended September 30, 1978, the Company had no borrowings under the agreement.

The Company is a defendant with other motion picture producers or distributors in a number of private treble damage actions asserting claims under the federal anti-trust laws. These actions, which seek damages aggregating hundreds of millions of dollars, are in various stages of pre-trial proceedings. The Company has

denied the material allegations of the complaints in these actions and in the opinion of management and counsel the Company will not suffer any material liability by reason thereof.

NOTE 8

Operations by Quarter (Unaudited):

A summary of certain information pertaining to operating results for each quarter of fiscal years 1978 and 1977 is shown below (in thousands of dollars, except for per share data). The information has been reclassified from that previously reported to shareholders to comply with reporting for business segment requirements adopted in 1978.

NOTE 9

Replacement Cost Information (Unaudited):

The Company has experienced the normal effects of inflation in recent years. By improving productivity, controlling costs and increasing selling prices, where competitive conditions permit, the Company has sought to lessen the impact of inflation. The Company does not anticipate that its future cash flow will be significantly affected by capital expenditures for replacement of plant and equipment.

In compliance with Securities and Exchange Commission requirements, the Company has presented replacement cost information in its Form 10-K Report with that agency (a copy of which is available upon request). In issuing its requirements, the Commission expressed caution and warning concerning inconsistency, lack of comparability, and simplistic use of the replacement cost data. Further, the Company does not believe

that the required techniques and related calculations produce meaningful data because of the highly theoretical nature of and the imprecisions inherent in the replacement cost exercise and the subjectivity necessarily involved in making those estimates. In addition, the requirement ignores circumstances, such as exist with the Company, where existing capacity can be maintained on a cost competitive basis by a comprehensive maintenance and refurbishment program.

Regardless of the reservations expressed above, the Company has sought conscientiously to formulate the replacement cost data in accordance with the SEC's requirements. The disclosure contains specific information with respect to estimates of the current replacement cost of the productive capacity of the Company and its subsidiaries as of September 30, 1977 and September 30, 1978 together with related amounts of costs and expenses on the basis of replacement cost for the years then ended.

Report of Independent Accountants

1880 CENTURY PARK EAST WEST LOS ANGELES CALIFORNIA 90067

November 20, 1978

To the Board of Directors and Stockholders of Walt Disney Productions

In our opinion, the accompanying consolidated balance sheet and the related consolidated statements of income, retained earnings and changes in financial position present fairly the financial position of Walt Disney Productions and its subsidiaries at September 30, 1978 and 1977, and the results of their operations and the changes in financial position for the years then ended, in conformity with generally accepted accounting principles consistently applied. Our examinations of these statements were made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.
